Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 20, 2003 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dennis R. Daley on December 12, 2003.

3. The application has been amended as follows:

- 2.1. Claims 16-26, 29-30, 33-40 have been canceled without prejudice to their continued prosecution in a continuation application.
 - 2.2. The TITLE has been replaced with: --METHOD FOR MANUFACTURING A MOLDED DETERGENT COMPOSITION--.

STATEMENT OF REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

The claims in their present forms have overcome the prior art of record because none of them teaches, discloses or suggests a method for manufacturing a molded detergent composition in the manner as those recited, in particular, the steps of mixing a hydrated component and a hydratable component as those recited, without heating, with an enzyme, or with a solvent containing volatile organic compounds; molding the mixture by extrusion to provide a molded detergent composition having a molded shape and solidifying the molded detergent composition as a result of movement of water of hydration from the hydrated component to the hydratable component to provide the molded detergent composition as a solid under conditions of room temperature and atmospheric pressure, wherein the step of solidifying takes about 1 minute to about 15 minutes. The rejection based upon Scepanski (US Patent No. 5,670,473) is rendered moot in view of applicants' cancellation of the composition claims. Ando (JP 09217100), the closest prior art, although teaching using an extruder for stirring and mixing the ingredients and loading into molds (see page 11 section [0035] of the official English translation), fails to teach molding the mixture by extrusion to provide a molded detergent composition having a molded shape and solidifying the molded detergent composition from about 1 minute to about 15 minutes as required in the present claims. The solidification step of Ando is within a period of as long as 24 h, but generally in 1-5 h (see page 10 section [0034] of said translation), which step is outside the scope of the present claims. In addition, even though Ando teaches the solidification step in

the absence of heat or pressure (see claim 2 on page 1 of said translation), Ando fails to disclose mixing a hydrated component and a hydratable component without heating as required in independent claim 1. Accordingly, the subject matter, as a whole, would not have been obvious to one of ordinary skill in the detergent art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lorna M. Douyon whose telephone number is (703) 305-3773. The examiner can normally be reached on Mondays-Fridays from 8:00 AM to 4:30 PM.
